Managed Services Agreements

Maverick Solutions
has a better way for
you to budget for your
school's IT expenses

The Right Managed Services Agreement for Your School & Budget

Computers are more than just machines - they are the lifeblood of your school. When they are working properly, you hardly think about them. But

when something's wrong, unexpected, costly repairs can overwhelm your IT budget. In today's computer-savvy, competitive world, you can't afford to leave your system maintenance - or your expenses - to chance.

A **Managed Services Agreement** gives you better control of your IT expenses through...

- *Level Billing*
- *Proactive Maintenance*
- *Guaranteed Response Time*
 - ◇ *Telephone Support*
 - ◇ *Remote Connection*
 - ◇ *On-site Dispatch*

Many businesses, schools, and not-for-profits already trust us to maintain and support their networks, and now it's easier than ever to fit our services into your budget. Our service contracts cover basic network monitoring, upgrades, preventative maintenance, desktop support, and emergency coverage. Your contract will be tailored to fit your budget and priorities. You can choose the level of support that is right for your school.

A Managed Services Agreement from **Maverick Solutions** is the best way to keep your network running optimally and your expenses under control.

Maintenance of Workstations & Servers

Tier 1

Designed for clients that require minimal ongoing support for their computer networks, it covers basic network monitoring and updates/service packs for Windows, Java, Adobe Reader, Flash, Shockwave, and any software that participates in the Microsoft Update Service.

Tier 2

Designed for clients that require more than just the basic services in Tier 1, it additionally covers client desktop support, such as computer setup, printer driver installation, application software installation & uninstallation, email client configuration, local file backup/restoral, and application end-user support.

Tier 3

Designed to provide maximum support, it includes all of the services of the first two tiers, but is provided 24 hours per day, 7 days a week.

Basic Maintenance of Internal Connections

This covers the complete infrastructure from the central distribution point out to each computer, including the network switch or hub, patch panel, cables, jacks, and wired NIC. *This can be contracted in conjunction with a Tier 1, 2, or 3 Managed Services Agreement or independently.*

RATE SHEET*

Effective January 1, 2009

Maintenance of Workstations & Servers

Tier 1 (Basic network monitoring & updates)
